CLEAN & AFFORDABLE ENERGY CONFERENCE

Doubletree by Hilton
PORTLAND, OR

DECEMBER 6,
2023

Table of Contents

Agenda.....	3-4
Speaker Bios.....	5-12
Clean Energy Awardees.....	12-15
NW Energy Coalition Members.....	16-17
Sponsors.....	18

Welcome to the Clean & Affordable Energy Conference

We're happy to be together again for the first time since 2019. One of the most important functions the NW Energy Coalition performs is bringing together citizens, businesses, utilities, advocacy organizations, and policymakers to discuss issues that affect our shared energy future.

We know from past experience that what's said here today can and probably will help shape policy and programs. So, I hope you'll contribute to the conversation, learn from the experts on the panels, and enjoy the company of others who share your commitment to a clean, equitable, and affordable energy future.

Sincerely,

A handwritten signature in black ink that reads "Nancy Hind". The signature is written in a cursive, flowing style.

Executive Director
NW Energy Coalition

Agenda

8:00am – 9:00am: **Registration, Breakfast, Networking**

9:00am – 9:10am: **Welcome – Nancy Hirsh, Executive Director, NW Energy Coalition**

9:10am – 10:25am: **Panel 1 - Energy efficiency and distributed energy resources for vulnerable populations**

Northwest communities are facing economic challenges and rising utility costs that are increasing energy burdens, especially for the most vulnerable. Targeted deployment of energy efficiency and distributed energy resources (DERs), such as rooftop solar or battery storage, can create a more equitable and affordable energy system. How can we use energy efficiency and DERs to not only meet peoples' energy needs, but also create healthier, more affordable, and more comfortable homes? Can clean electricity planning and programs be more targeted to help utilities, regulators, and policymakers prioritize energy efficiency and DERs for overburdened and vulnerable communities?

Moderator: Charlee Thompson, Policy Associate, NW Energy Coalition

- **Linda Garcia**, Policy and Outreach Director, Washington State Community Action Partnership
- **Veena Prasad**, Program Director, Spark Northwest
- **Sam Baraso**, Program Manager, Portland Clean Energy Fund
- **Sarah Hall**, Resources and Program Development Manager, Oregon Public Utility Commission

10:25am – 10:55am: **Networking break**

10:55am – 12:10pm: **Panel 2 - Modernizing the Bonneville Power Administration**

As the owner of the majority of the Northwest's transmission and marketer of the federal hydropower network, BPA's policies and actions impact every aspect of our electric system. The electric system is rapidly changing, and we must restore salmon populations and advance decarbonization while modernizing the energy system to be more equitable and affordable. How can we ensure that BPA's new 20-year contracts with its customer utilities and its investments in transmission and energy efficiency more effectively position the region for the future?

Moderator: Lauren McCloy, Policy Director, NW Energy Coalition

- **Nicole Hughes**, Executive Director, Renewable Northwest
- **Les Purce**, Council Member, Northwest Power and Conservation Council
- **Emeka Anyanwu**, Energy Innovation and Resources Officer, Seattle City Light
- **Aja DeCoteau**, Executive Director, Columbia River Inter-Tribal Fish Commission

12:10pm – 1:20pm: **Lunch**

1:20pm – 1:50pm: **Community Cohort Roundtable**

The Community Cohort is a group of individuals from across Oregon with a shared interest in learning about energy and ways to advocate before the Oregon Public Utility Commission (PUC). Some of these cohort members have been involved since the Oregon Green New Deal Listening sessions in 2020 that ultimately created the Oregon Clean Energy Opportunity campaign which helped to advance HB 2021, HB 2475, and HB 2842. The group has met regularly over the past year to share ways to be more involved in PUC processes, understand regulatory and technical language of utility

planning documents, and how to give meaningful public comments, among other activities. In the Roundtable discussion, a few group-members will reflect on their experiences simultaneously building a sense of community among members and capacity to engage with energy issues in Oregon.

Moderator: Alma Pinto, Energy Justice Policy Associate, NW Energy Coalition

- **Alessandra de la Torre**, Policy Associate, NW Energy Coalition
- **Nikita Daryanani**, Climate & Energy Policy Manager, Coalition of Communities of Color
- **Maria Dolores**, Community Organizer, Adelante Mujeres
- **Alec Perrone**, Community Cohort Member
- **Martha G Herman**, Spanish Translator

1:50pm – 2:10pm: **Keynote speaker – Senator Kate Lieber**, Oregon Senate Majority Leader

2:10pm – 2:40pm: **Networking break**

2:40pm – 3:20pm: **Keynote speaker – Rich Glick**, Principal, GQ New Energy Strategies

3:20pm – 3:40pm: **Networking break**

3:40pm – 4:55pm: **Panel 3 - Rethinking utility planning for equity and affordability**

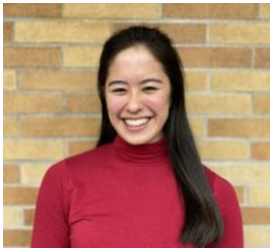

For decades, utilities have developed comprehensive plans attempting to provide reliable and affordable energy for customers. However, outcomes have not always been equitable or affordable for vulnerable and frontline communities. Our energy system is rapidly and dramatically changing, and status quo planning will not effectively deliver tangible benefits to highly impacted communities without changes to how stakeholders participate, how we determine cost parameters, and the metrics utilities use to determine benefits and resource needs. How have planning expectations changed in our region? What best practices are we seeing to effectively increase participation of highly impacted communities, and to develop tangible community benefit indicators?

Moderator: Diego Rivas, Regulatory Counsel, NW Energy Coalition

- **Heather Moline**, Section Manager of Energy Planning, Washington Utilities and Transportation Commission
- **Yasmin Abraham**, President and Co-Founder, Kambo Energy Group
- **Mariel Thuraingham**, Clean Energy Policy Lead, Front and Centered
- **Jenn Latu**, Manager of Community Engagement, Portland General Electric

5:00pm – 7:00pm: **Clean Energy Awards Reception**

Panel 1: Energy efficiency and distributed energy resources for vulnerable populations

Charlee Thompson (she/her), NW Energy Coalition

Charlee joined the Coalition as a Policy Associate in June 2022. She is passionate about using science and policy to have a meaningful impact on the environment and underserved communities. She has worked for electric utilities and energy and clean mobility nonprofits performing data analysis, research, and advocacy. Charlee hopes to dedicate her career towards the clean energy transition and climate change mitigation in the Pacific Northwest. She has an M.P.A. in Environmental Policy & Management from the University of Washington and a B.S. in Civil Engineering from the University of Illinois. In her free time, she enjoys weightlifting, running, hiking, writing, and new experiences!

Linda Garcia (she/her), Washington State Community Action Partnership

Linda Garcia is a passionate and dedicated advocate for underrepresented populations and has demonstrated her steadfast commitment to social equity through her persistent work in affordable housing, poverty alleviation, and environmental justice. As the Policy and Outreach Director at the Washington State Community Action Partnership, she continues to work tirelessly to advance equitable policies that serve to strengthen families in communities with limited resources. As the North American recipient of the prestigious 2019 Goldman Environmental Prize, Linda continues to use her voice and platform to raise awareness of the global connections between human rights, social justice, and the critical need for systemic change. She welcomes all opportunities to be a catalyst for substantive policy reform in the field of equitable social justice.

Veena Prasad (she/her), Spark Northwest

Veena Prasad is the Program Director at Spark Northwest, a nonprofit organization that partners with rural, Indigenous and low-wealth communities to build an equitable clean energy future. As Program Director, one of Veena's priorities is to advocate for and include deep community engagement strategies in program design and implementation. She joined Spark Northwest in 2022 inspired by the opportunity to work at the intersection of equity and renewable energy, crucial ingredients in the race to decarbonize our society. Veena has a Bachelor of Science degree in Electrical Engineering from Purdue University and a Master in Business Administration degree from University of Washington Foster School of Business. Veena grew up in India and has called Seattle home since 2007.

Sam Baraso (he/him), Portland Clean Energy Fund

Sam Baraso has led the Portland Clean Energy Community Benefits Fund program, affectionately known as PCEF locally, since its resounding approval by 65% of Portland voters in November 2018. PCEF invests over \$150 million annually in community-led and community-driven projects focused on clean energy, transportation decarbonization, green job training, and green infrastructure. Sam is a maestro of community and government collaboration. He works to bring together a diverse ensemble of stakeholders towards a shared vision for climate justice in Portland. Prior to his role at the City, Sam served as a senior policy advisor in Multnomah County’s Office of

Sustainability. Sam holds a master’s degree in environmental management from Duke University and an undergraduate in finance from Washington University in St. Louis.

Sarah Hall (she/her), Oregon Public Utility Commission

Sarah Hall is Resources and Program Development Manager at the Oregon Public Utility Commission, within the Energy Resources and Planning Division. She manages and leads the team implementing energy efficiency, demand response and flexible load, transportation electrification, distribution system planning, community solar, and other customer offerings by Energy Trust of Oregon and investor-owned

utilities. Previously she worked at Sustainable Northwest, a regional conservation nonprofit, where she served as Chief Operating & Financial Officer. Sarah held strategic management positions at Wells Fargo, where she formed the first corporate sustainability function for the wholesale bank. Earlier she directed the documentary film ‘Restoring a Treasure: The Upper Klamath Basin.’ She’s also a native Oregonian and holds a BA from Brown University, Phi Beta Kappa.

Panel 2: Modernizing the Bonneville Power Administration

Lauren McCloy (she/her), NW Energy Coalition

Lauren McCloy joined the NW Energy Coalition as Policy Director in 2021. Previously, Lauren worked as Senior Policy Advisor to Governor Jay Inslee, Washington State, where she led and managed a broad range of issues in support of the Governor’s energy agenda. Prior to serving in that role, Lauren was the Legislative Director for the Washington Utilities and Transportation Commission (UTC), where she was the commission’s liaison to the state Legislature and the Governor’s office and was

responsible for developing and coordinating the UTC’s legislative activities. Lauren has a B.A. from the University of North Carolina at Chapel Hill and an M.S. in International Development from Tulane University Law School.

Nicole Hughes, Renewable Northwest

Nicole Hughes, Executive Director of Renewable NW has over 20 years of experience in the renewable energy industry; including work in project development, construction, finance, permitting and policy for utility-scale wind and solar. Previously, she worked at AWS Truepower, HDR, Element Power, RES Americas, Tetra Tech, and The Bonneville Power Administration. Through her diverse background in the industry, Nicole has learned the importance of relationship and coalition building among diverse stakeholders to move the region towards a clean energy future. Nicole has served in a variety of board and volunteer positions advocating for support for individuals with disabilities,

environmental conservation, and energy issues.

Les Purce, Northwest Power and Conservation Council

Dr. Purce served as president of The Evergreen State College from 2000 to 2015. Prior to that, he served as vice president of extended university affairs and dean of extended academic programs at Washington State University in Pullman, Washington. In the private sector, Purce worked as the chief operating officer of Power Engineering, Inc. based in Hailey, Idaho.

Before his extensive career in academia, Dr. Purce was active in the political arena. While in his late twenties, Purce was elected to the Pocatello City Council in 1973 and in 1976 he became Pocatello's first black mayor. He has also held several appointments on boards and councils, most recently as co-chair of the Southern Resident Orca Task Force. Dr. Purce and his wife, Jane Sherman, live in Olympia, Washington. They have three adult daughters Deborah, Sarah, and Miriam.

Emeka Anyanwu (he/him), Seattle City Light

Emeka has been with Seattle City Light since March 2018 and leads the utility's business unit responsible for work in innovation strategy, transportation and building electrification, grid modernization, implementation of strategic grid technologies, and the utility's IT and OT technology strategy, and cybersecurity functions. He is also responsible for overseeing regional affairs and trade organization engagements, power resource management functions, and the power marketing operations of the

utility, including acquiring wholesale power, transmission, and other related services to meet the utility's short and long-term demand. The team's work drives Seattle City Light's strategic execution to meet the Utility's current and future customer and community needs and expectations in the new energy marketplace. Emeka has been in the industry for over 2 decades, marking 5 years with Seattle in March 2023, after having previously been at Kansas City Power & Light Company (now Evergy) for 16 years.

Aja DeCoteau, Columbia River Inter-Tribal Fish Commission

Aja DeCoteau is a citizen of the Confederated Tribes and Bands of the Yakama Nation and has other tribal lineage with the Cayuse, Nez Perce and Turtle Mountain Band of Chippewa Indians. She has over twenty years of experience working on natural resource management and policy issues in the Columbia River Basin. Prior to serving as the Executive Director, she was CRITFC’s Watershed Department Manager where she coordinated fisheries restoration and watershed protection activities and researched climate change response on behalf of the Yakama, Nez Perce, Umatilla, and Warm Springs tribes.

Community Cohort Roundtable Discussion

Alma Pinto (she/her), NW Energy Coalition

Alma joined the Coalition in July 2023 as an Energy Justice Policy Associate. Prior to her role at the coalition, she worked at Community Energy Project, where she advocated for frontline communities at the Oregon state legislature, local government, and Oregon Public Utility Commission spaces to advance energy justice, climate justice, and housing equity. She also interned with Energy Trust of Oregon and the Metro Regional Government, and spent three years doing community organizing and research for a bi-national non-profit in South Texas dedicated to environmental justice. Alma holds a BS in Energy and Sustainability Policy from Penn State, and is passionate about equitable climate solutions and working towards a just and clean energy transition.

Alessandra de la Torre (she/her/ella), NW Energy Coalition

Alessandra joined the coalition in November 2023 as a policy associate after working with Rogue Climate advocating for energy justice and for community resilience. Over the past six years, she has led campaigns, organizing, and implementation in the Oregon Public Utility Commission, in the Oregon State Legislature, and in communities across Oregon. She previously served on Oregon’s Wildfire Programs Advisory Council as the environmental justice representative and has a B.S. in Sociology from Southern Oregon University. If there’s flowers around, Alessandra is smelling and admiring them. One of her favorites are dahlias. You can also find her hanging out with her dog, dancing and making fun memories with loved ones in the Rogue Valley, SF Bay Area, Mexico, and beyond.

Maria Dolores Torres (she/her/ella), Adelante Mujeres

Soy Madre de tres jovenes todos ya casados. Me gusta involucrarme en las mejoras de mi comunidad y también soy de la comunidad. Estudie en mi pais una carrera media superior y ahora resido en Oregon por los ultimos casi 30 años. Trabajo con la comunidad desde la educación y soy Organizadora comunitaria con la Organización de Adelante Mujeres. Disfruto y amo ser puente de coneccion entre los recursos y mi comunidad.

I am a mother of three young people, all already married. I like to involve myself in the improvements of my community and I am also from the community. I earned an upper secondary degree in my country and I have resided in Oregon for nearly 30 years. I work with the community through education and I am a community organizer with Adelante Mujeres. I enjoy and love being a bridge between resources and my community.

Alec Perrone (he/him), Community Cohort Member

Alec is a landscaper, musician, and enthusiastic member of the 100% Clean Energy For All Cohort. He resides in Medford, Oregon. Impacted by his early experiences with damaged ecosystems, Alec advocates for the preservation of watersheds and old-growth forests. He also promotes rural, community-based energy projects. He graduated from Southern Oregon University in 2020, and then jumped straight into energy justice and community

campaigns with organizations such as Rogue Climate, 1000 Friends of Oregon, and Oregon Just Transition Alliance to name a few. Alec also volunteers by writing small grants for several local organizations. You can find him online at [@alec.i0](https://www.instagram.com/alec.i0).

Nikita Daryanani (she/her), Coalition of Communities of Color

Nikita grew up in Irvine, California and received her Bachelor's degree in Environmental Policy Analysis and Planning from UC Davis. After graduating, she spent two years working alongside low-income, communities of color in California's San Joaquin Valley where she coordinated community-led advocacy efforts around transportation equity, air quality, agroecology, and land use planning. She received her Master of Development Practice from UC Berkeley, where her academic

research focused on community-driven approaches to development and international environmental policy. At CCC, Nikita helps lead statewide advocacy for energy justice and supports collaborative partnerships between local government and community leaders to advance climate solutions that center the needs and priorities of frontline communities. You can contact her at nikita@coalitioncommunitiescolor.org.

Martha G Herman (she/her), UMC, Inc

I have resided in the PNW for over a decade and for me, this is home. Passionate about community empowerment, social justice, and language access. Working in the Construction Industry for over two years and being part of the Community Cohort at NWECC for the last year has broadened my perspective on energy justice and sparked a new interest in me.

Keynote speakers

Senator Kate Lieber (she/her), Oregon State Senate

Senate Majority Leader Kate Lieber represents Senate District 14, which includes Beaverton and SW Portland. Senator Lieber is a mother of two, a breast cancer survivor, a former community college instructor, and an attorney. As a State Senator and the Senate Majority Leader, she continues to work to ensure the state government is solving the most pressing problems facing Oregonians, from the homelessness crisis and community safety to wildfires and rising prices.

Rich Glick, GQ New Energy Strategies

Rich is a Principal with GQ New Energy Strategies – a consulting firm he co-founded with Pamela Quinlan. He recently completed a five-year term as a Commissioner with the Federal Energy Regulatory Commission (FERC) where he chaired the Commission for two years. As Chairman, Rich initiated several key initiatives, including proposals to reform the planning and cost allocation process for electric transmission; expedite and enhance the generator interconnection process; improve the operation of organized electric capacity markets; and protect the reliability of the electric grid against weather-related, cybersecurity, and physical attack threats.

Panel 3: Rethinking utility planning for equity and affordability

Diego Rivas (he/him), NW Energy Coalition

Diego joined the Coalition in 2010 as a policy associate working on energy efficiency matters in Montana. Later, as senior policy associate, he led Coalition advocacy of clean and affordable energy policy in Montana and Idaho. Now, as regulatory counsel, he oversees Coalition involvement in utility proceedings and represents the Coalition in Public Utility Commission dockets. Diego has a B.S. in political science from the University of Georgia (go Dawgs!) and a J.D. from Mitchell Hamline School of Law in St. Paul, MN (go law students!) He is an avid sports fan, especially soccer (c’mon you gunners!) and baseball (go bravos!). He spends his free time with his family in Montana’s great outdoors hiking, camping, boating, hunting, fishing, and playing or watching his kids play organized sports.

Heather Moline (she/her), Washington Utilities and Transportation Commission

Heather Moline is Section Manager of Energy Planning at the Washington Utilities and Transportation Commission. Prior, she was NW Energy Coalition’s Energy & Environmental Justice Policy Associate. Outside of work she enjoys supporting local and international movements for justice and resilience, such as the international eco-municipality movement (Ecomuna/Sustainable Sweden). In her spare time, she can be found bike commuting, playing with her dog Jason Momoa, or dragging others to various ethnic dance events, especially West African, Latin, and Irish.

Yasmin Abraham, Kambo Energy Group

Yasmin is President and Co-Founder of Kambo Energy Group, a social enterprise that reduces energy poverty and improves housing in communities that have historically been underprioritized across the pacific northwest. For over 14 years Kambo has supported communities through its three flagship programs: Empower Me, an education and awareness program to support environmental justice communities; the Home Upgrades Program, a deep energy retrofit program to reduce energy poverty, and Community Power which works with Tribal and First Nations to take action on housing.

Yasmin is a leading expert in equity-based energy and climate programming, working with governments and utilities across North America to design and deliver inclusive solutions.

Mariel Thuraingham (she/her), Clean Energy Policy Lead, Front and Centered

Mariel is an environmental law and policy specialist leading Front and Centered’s commitment to advancing the clean energy interests of frontline communities in Washington that are historically disproportionately harmed by climate change. After completing her law degree she worked on justice sector strengthening and rule of law in Central America, Central and Southeast Asia, Eastern Europe, and West Africa, where she observed the important interplay of communities, institutions and infrastructure in supporting resilient and equitable socioeconomic systems. Through coalition-building, outreach and advocacy, Mariel works at the intersection between progressive policies and their translation into an effective and enforceable legal and regulatory framework for environmental justice, climate change mitigation, and sustainable living. She enjoys gardening.

Jenn Latu, Portland General Electric

Jenn Latu, the Manager of Community Engagement at Portland General Electric (PGE), has over a decade of utility experience and holds a master's in industrial-organizational psychology. Jenn's experience in people change management is foundational to her work. Throughout her PGE tenure, she's played various roles, including guiding individuals through change, internal consulting on outreach and engagement of environmental justice communities, and establishing PGE's Community Benefits & Impacts Advisory Group (CBIAG). In her current capacity, Jenn oversees PGE's

CBIAG, manages outreach for PGE's Income Qualified Bill Discount Program, and provides expertise and consultation on community engagement and equity related initiatives.

Emerging Clean Energy Leaders

Recognizing the next generation of clean energy leaders

Makenna Sellers (she/her), Montana Renewable Energy Association

Makenna is the Executive Director of the Montana Renewable Energy Association. She previously worked for Northern Plains Resource Council, where among other successes she was largely responsible for the passage of Montana's C-PACE legislation. Makenna is a strong voice within the clean energy community and uses that voice in support of good bills and against bad ones.

Marli Klass, Oregon Department of Justice

Marli is an Assistant Attorney General at the Oregon Department of Justice. Previously, she was the Energy and Environmental Justice Policy Associate for the NW Energy Coalition, where she worked to build the Oregon Community Cohort, a program to bring new voices into the world of advocacy in front of the Oregon Public Utility Commission. As a Palauan

woman, she has worked extensively within her community doing energy and environmental outreach.

Wil Gehl, City of Boise

Wil is the Energy Program Manager for the City of Boise. He previously served as the Executive Director of the Community Action Partnership Association of Idaho. Wil is known for his consistent and strong advocacy for clean energy and for affordability and efficiency programs that deliver real benefits to those in need. He brings strong analysis and excellent diplomacy to all of his work.

Headwaters Award

Todd True

For always going above and beyond to create a clean, equitable, and affordable energy future

The Headwaters Award honors achievement and leadership by a person who is directly involved in NWEA and who excels in advancing our collective goals and mission. And by Headwaters, we are of course talking about the headwaters of the Columbia River in Columbia Lake in British Columbia – at an elevation of 2,690 ft above sea level.

Todd is a senior attorney at Earthjustice’s Northwest regional office in Seattle and was one of two attorneys who opened the office in 1987. Todd is a champion for salmon recovery. Over the past 20+ years he has taken the time to learn about and understand energy system operations and how the hydropower system works. He has led long, arduous and successful litigation to avoid species extinction and recover healthy and abundant salmon populations.

Doug Still Memorial Community Organizing Award

Front and Centered

For exceptional work mobilizing the community to create a clean, equitable, and affordable energy future

Doug Still was a founder of the Coalition and a community organizer for over 60 years. This award honors individuals or organizations for their commitment to directly engaging citizens in taking action for a clean, affordable, and equitable energy future.

Front and Centered is a diverse and powerful coalition of communities of color-led groups across Washington State, whose missions and work come together at the intersection of equity, environmental and climate justice. Together, and with key partners the coalition actively works towards the vision for a Just Transition. Front and Centered practices equitable governance principles, guided by a Community Council which oversees Front and Centered's portfolio of policy, programs, and capacity building efforts.

Bob Olsen Memorial Conservation Eagle Award

Green Energy Institute (GEI) at Lewis and Clark Law School

In recognition of your leadership to create a clean, equitable, and affordable energy future

The Eagle is awarded annually to recognize individual or organizational leadership for a clean, affordable, and equitable energy future. Bob Olsen was a visionary leader within the public power utility community and NWECC, and one who pushed hard to advance energy efficiency as a means to delay new power generation before conservation and efficiency were established resources.

The Green Energy Institute is known for developing smart and comprehensive legal and policy strategies to address climate change and support a swift and equitable transition to a sustainable, carbon-free energy grid. Coalition staff and the wider clean energy community have gained so much working with the GEI team over the past few years and watching them dive deep into proceedings in front of the Oregon Public Utility Commission, as well as their work on advancing clean energy policies in the state.
